

Features of a good cervical pillow :

- ~ HIGH-QUALITY, HIGH-DENSITY FOAM.
- ~ A CONTOURED SHAPE DESIGNED TO CRADLE YOUR NECK AND HEAD.
- ~ AREAS WITH VARYING SUPPORT FOR EACH PART OF THE UPPER BODY.

New generation medical-grade foam for made-to-measure sleep.

The SYSTAM® cervical pillow benefits directly from the company's development of memory polymers designed for medical applications.

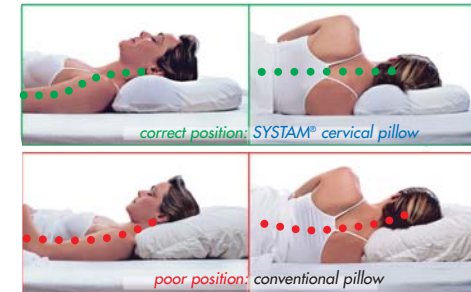

The SYSTAM® cervical pillow is the result of advanced research into chemical components, formulae and ergonomic design. It has been conceived specifically for the cervical spine, an area frequently subjected to muscular pain and stiffness.

The memory effect allows the pillow to gently mould to the contours of the cervical area, thus allowing the neck and head to sink slowly into the foam and improving comfort during various phases of sleep.

The SYSTAM® cervical pillow respects the natural curvature of the spine.

The SYSTAM® cervical pillow respects the curvature of the spine

Multibearing foam for increased comfort and optimal cervical support:

WHITE FOAM :

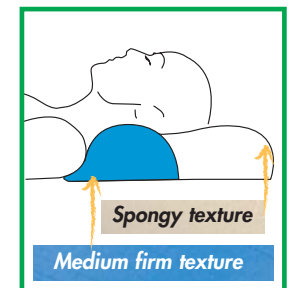

Particularly spongy texture ensuring excellent comfort

BLUE FOAM :

Medium-firm texture for optimal support of the small of the neck

WHY TWO DIFFERENT DEGREES OF SUPPORT?

Because each part of the body has its own morphology and does not bear the same weight, thus requiring differing levels of firmness.

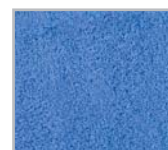

Improved aeration

GROOVED SURFACE:

Enhances aeration of contact zones

OPEN AIR CELLS :

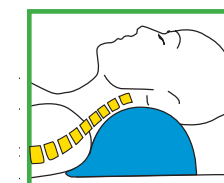

Increases hygiene by allowing the foam to "breathe."

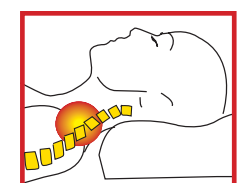

Cervical point :

The fruit of extensive research, the unique cervical protrusion guarantees proper and effective support of the upper vertebrae whether you sleep on your back or side.

SYSTAM® cervical pillow

Conventional contoured pillow

Reduction in pressure points & Improvement of cervical support :

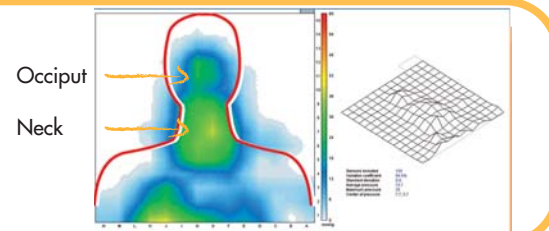

➤ The SYSTAM® cervical pillow reduces pressure points (as measured by pressure mapping devices) and respects the natural curvature of the spine, relieving muscle tension and easing respiration. This results in a sound, relaxing and refreshing sleep.

➤ Due to its innovative ergonomic shape and the moulding properties of memory foam, the SYSTAM® cervical pillow brings about improved cervical support and a reduction in cranial pressure points.

SYST'AM® cervical pillow

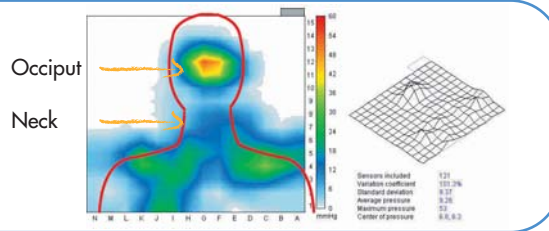

Excellent cervical support as a result of its large contact surface while respecting the curvature of the upper spine. Significant reduction in pressure points to the head.

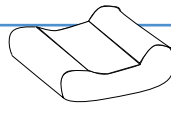

Regular pillow

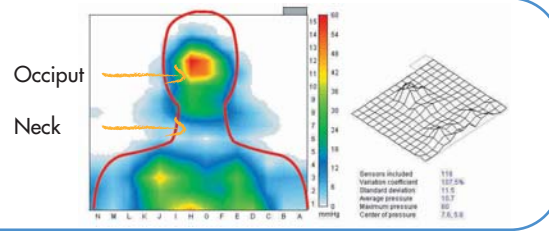

No cervical support as there is little contact between the pillow itself and the vertebrae. Does not respect the natural curvature of the spine and pressure points to the occipital region are relatively high

Conventional contoured pillow

Low spinal contact with pillow (as compared with the SYSTAM® pillow) and therefore less effective in providing support to the small of the neck. Pressure points are higher to the occipital region (as compared with the SYSTAM® pillow).

Care and maintenance

Pillowcase : Wash at 100° F, gentle cycle. No bleach. Do not iron. Tumble-dry on low setting.

Pillow : Wash with lukewarm, soapy water and rinse with clean water. Do not use bleach. Do not iron. No dry cleaning. Do not tumble-dry.

Warranty

The SYSTAM® cervical pillow is warranted for 3 years against deterioration of the foam, subject to normal use.
The SYSTAM® cervical pillow is warranted for 1 year against manufacturing defects.

Syst'am respects the environment

New generation 0% CFC foam. Respects the ozone layer.

Characteristics

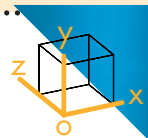

DIMENSIONS AND WEIGHT

Depth : 20"
Width : 16"
Height : 4"
Poids : 2lbs. 11oz

COMPOSITION :

Foam : Hypoallergenic medical-grade viscoelastic polyurethane foam
Very high density: 230 lbs./ cu. yd.

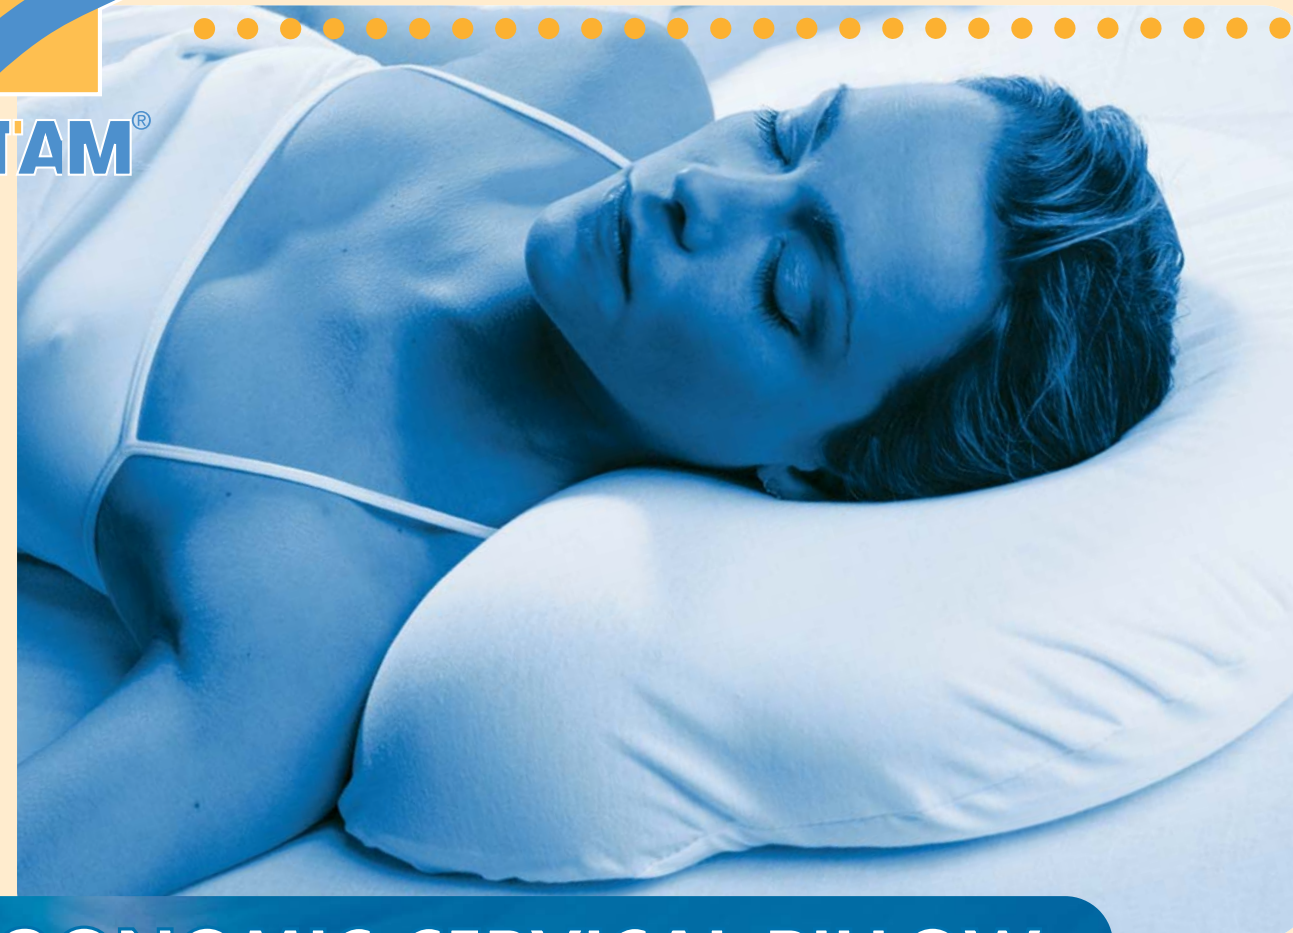

Pillowcase : 54% polyester – 46% cotton. Hypoallergenic.

CERVICAL PILLOW

ERGONOMIC CERVICAL PILLOW WITH MEMORY FOAM

- Relieves pressure on cervical vertebrae and relaxes muscles in the upper spine and neck.
- Facilitates breathing during sleep.
- Improves circulation by reducing pressure points.
- Respects the natural curvature of your cervical spine.

For sound, relaxing and refreshing sleep!
