

QUALITY SLEEP

Essential to our daily well-being

Sleep is a biological mechanism that is essential to us all, regenerating our body each night. The quality of sleep is therefore essential to our daily well-being.

A poor sleeping position, due to an unsuitable pillow or mattress is the source of soreness and stiffness in the muscles of the neck and back.

Restless sleep can also be caused by parts of the body being subject to high pressure, thereby transmitting instructions to the brain to turn over and change position.

Because they relieve the pressure exerted and respect the natural curve of the spine, SYST'AM® products help you to find peaceful, deep, restoring sleep.

Restore your well-being with the SYST'AM® range of pillows...

MATERIALS OF NEW GENERATION COMING FROM MEDICAL TECHNOLOGY

SYST'AM® ergonomic pillows has benefited directly from SYST'AM® development of polymers with memory effect or high resiliency designed for use in the medical sector.

Result of advanced research not only into chemical components and formulae, but also into ergonomic shapes, the SYST'AM® cervical pillows were designed specifically with the cervical area in mind - one that is regularly subject to pain and stiffness.

ERGONOMICAL SHAPES WHICH RESPECT THE CURVATURE OF THE SPINE

- SYST'AM® pillows, through excellent cervical support, relieve the neck, respect the natural curvature of the spinal, thus decreasing the pains when waking up.
- Thanks to their innovating forms they guarantee a comfortable sleep whether you sleep on your back or your side.

CORRECT POSITION - SYST'AM® PILLOWS

POOR POSITION: REGULAR PILLOWS

3 YEARS

OUR 3-YEARS WARRANTY
Longer lasting

Thanks to the quality level and long life of SYST'AM® materials developed by medical research, we can offer a three years warranty on our range of pillows.

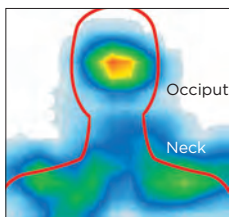

REDUCTION IN PRESSURE POINTS & IMPROVEMENT OF CERVICAL SUPPORT

- SYST'AM® ergonomic pillows reduce pressure points and respect the natural curvature of the spine, relieving muscular tensions and easing respiration. This result in a sound, relaxing and regenerating sleep.
- Due to their innovative ergonomic shape and the moulding properties of their foams, SYST'AM® ergonomic pillows bring about improved cervical support and a reduction in cranial pressure points.

Regular pillow

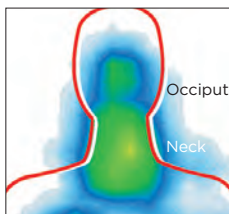

→ No cervical support as there is little contact between itself and the vertebrae. Does not respect the natural curvature of the spine and pressure points to the occipital region are relatively high.

Pillows SYST'AM®

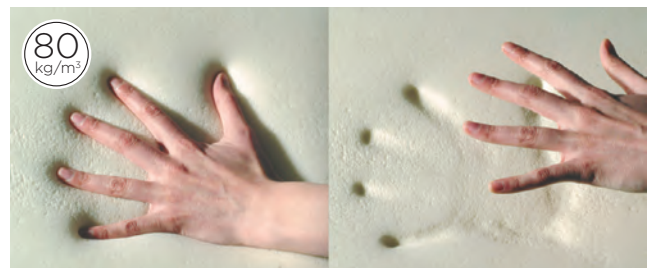

→ Excellent cervical support as a result of their large contact surface while respecting the curvature of the upper spine. Significant reduction in pressure points to the head.

MEMORY FOAM

Widely recognised in the medical field, memory foam has unique properties that offer optimal pressure relief. Its main characteristic is its ability to adapt gently to the shapes of the body under the effect of body heat, thus distributing the pressure exerted evenly.

THE «BENEFITS» OF OUR PILLOWS:

- Shapes and materials designed for everyone made-to-measure sleep.
- Medical foam.
- Very high density of 80 kg/m³.
- Exceptionally long-lasting.
- Hypoallergenic material.

A VARIED RANGE

to meet everyone's needs

TRADITIONAL Pillow

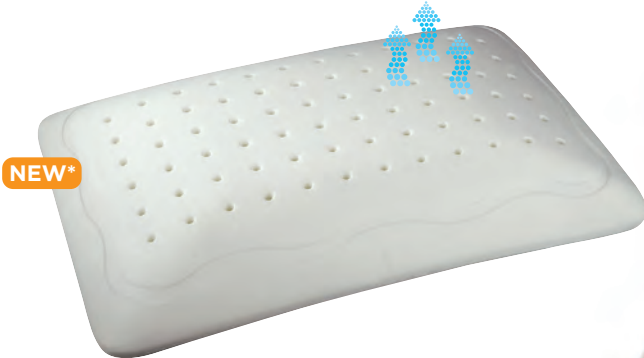

CERVICAL PAIN:

MEMORY FOAM

- Medical foam.
- Very high density of 80 kg/m³.
- Exceptionally long-lasting.

Micro-aeration

TRADITIONAL pillow C160P
made of memory foam
60 x 40 x 13 cm / 24 x 16 x 5"
Réf. C160P60401HV

ERGONOMIC Pillows

CERVICAL PAIN:

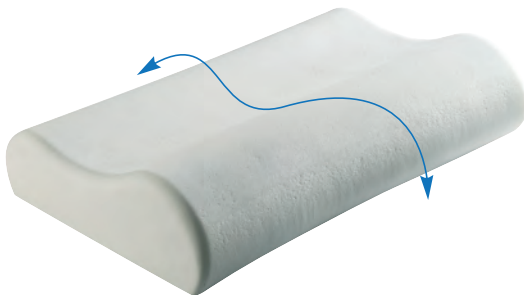

MEMORY FOAM

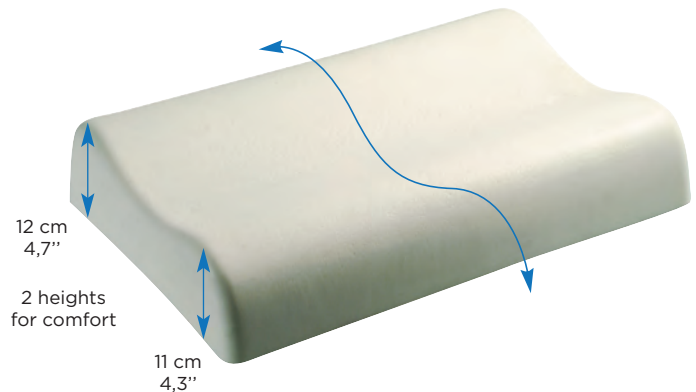

- Medical foam.
- Very high density of 80 kg/m³.
- Exceptionally long-lasting.

ERGONOMIC SHAPE

- Provides an excellent level of comfort when lying on the back or on the side.

ERGONOMIC pillow C120P
made of memory foam
50 x 32 x 10 cm / 19 x 12,6 x 4"
Réf. C120P50321HV

ERGONOMIC pillow C130P
made of memory foam
60 x 40 x 11/12 cm / 23 x 15 x 4,3/4,7"
Réf. C130P60401HV

CERVICAL Pillows

CERVICAL PAIN:

A RANGE OF PILLOWS WITH AN INNOVATIVE ANATOMICAL DESIGN

- Specifically developed by our R&D team to optimise vertebral support and relieve neck pain.
- Provides excellent comfort both on the back and on the side.

MULTIBEARING SURFACES FOR AN INCREASED COMFORT & OPTIMAL CERVICAL SUPPORT

Why two different degrees of support ?

- Because each part of the body has its own morphology and does not bear the same weight, thus requiring different levels of firmness.

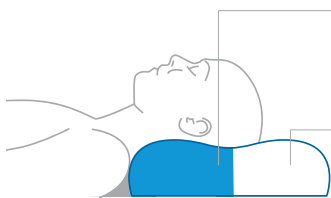

BLUE FOAM:

Medium-firm texture for optimal support of the small of the neck.

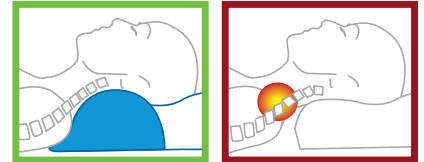

WHITE FOAM:

Particularly soft texture ensuring excellent comfort.

CERVICAL POINT

- The unique cervical protrusion guarantees proper and effective support of the upper vertebrae.

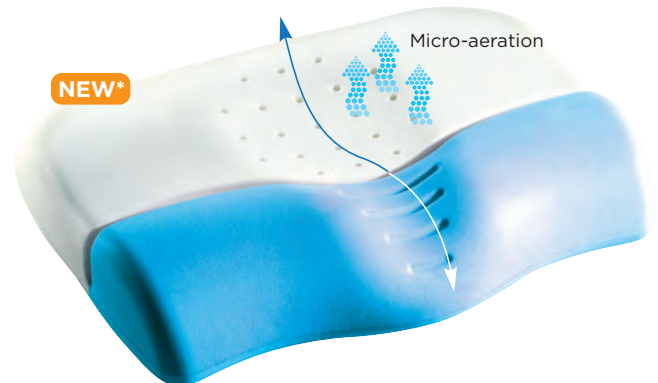

MEMORY FOAM

- Medical foam.
- Very high density of 80 kg/m³.
- Exceptionally long-lasting.

CERVICAL Pillow C100P
made of memory foam and multibearing surfaces
50 x 40 x 10 cm / 19 x 15 x 4"
Réf. C100P50401HS

NEW*
XL CERVICAL Pillow C101P
made of memory foam and multibearing surfaces
60 x 40 x 12 cm / 20 x 13 x 5"
Réf. C101P60401HV

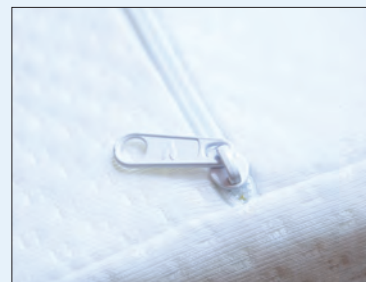

REVERSIBLE CERVICAL Pillow C150P
made of memory foam and multibearing surfaces
50 x 40 x 11/12 cm / 19 x 15 x 4,3/4,7"
